- Multi-axis static and revolving tools for turning, drilling, milling, tapping, knurling and contouring.
- Highly accurate and repeatable production to achieve complex geometries in one operation

### Equipment

- 6-Axis Swiss style live tool CNC machines with twin spindles and automatic bar feeders
- 5-axis CNC turning centers with twin spindles, live tooling and automatic bar feeders
- State of the art Keyence inspection equipment

### Engineering / Quality

- 3D CAD modeling
- Esprit CAD/CAM Programming
- Design collaboration to ensure cost effective machining
- Reverse engineering capabilities
- ISO 9001:2015 Certified
- Six-Sigma/Lean Manufacturing

### Why Sharp Turn?

Most CNC shops today are only looking to take on large quantity orders, this is where we're different. Sharp Turn is open to taking small quantity orders of 25 pieces or more, all while exhibiting the best in quality that the industry has to offer.

***As a family owned business, we are committed to serving our partners with integrity, efficiency and quality at every turn.***
